Commissioner Wolf—Commissioner Clark’s point is “well taken”. Voiced some concern regarding the proposed Density.

MOTION: Faust/Clark (0-6-0) DENIED

Reason(s) for Denial—3116.11 - Standards for alteration #2, #5, #6, #10, #11 & #12.

(2) The distinguishing characteristics of the property shall not be destroyed. The removal or alteration of any historic material or distinctive architectural feature shall be avoided whenever possible.

(5) Distinctive stylistic features and examples of craftsmanship that characterize a property shall be treated with sensitivity.

(6) Deteriorated architectural features shall be repaired rather than replaced whenever possible. In the event replacement is necessary, the new material shall match the material being replaced in composition, design, color, texture and other visual qualities. Repair or replacement of missing architectural features shall be based on accurate duplications of features, substantiated by historic, physical or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other structures.

(10) Whenever possible, a new addition or alteration shall be accomplished so that its future removal will not impair the essential form and integrity of the structure.

(11) Exterior cladding of a structure shall be consistent with the original materials used on the property.

(12) In passing upon appropriateness, the commission shall consider, in addition to any other pertinent factor, the architectural characteristics typical of structures in the district or listed property, the historical and architectural value and significance, architectural style, general design, arrangement, texture, material and color of the architectural feature involved and its relation to the architectural features of other contributing properties in the immediate neighborhood.

Conceptual Review

Construct a New Residence

Following the H. P. O. Staff Report and subsequent discussion with the Applicant's representatives present, the following represents some of the commissioners' observations.

Commissioner Comments/Observations:

Commissioner Morgan—Scale is appropriate. “Headed in the right direction.” The siding should wrap the corners and not use corner board trim treatment.

Commissioner Foster—Massing and materials seem appropriate. Recommends use of stone in the design.

Commissioner Rowan—Massing of the center roof ridge seems high. Voiced general support of the concept.

Commissioner Wolf—Height should be similar to the neighboring houses. Pediments on the dormers are a concern. Recommends consideration of “less hefty” porch columns and main entry door with sidelites. “The general (design) direction is good.”

Reason(s) for Denial
